

EkaXLE

DLP 3D Printer
For Engineering

202x113x200mm

An Authorised Partner of Make3d.in

MAKE3D.IN

FAST RESIN BASED 3D Printer

Made to Create Engineering Prototypes

Eka **XLE**

**DLP 3D Printer
For Engineering**

Sharp. Smooth. Reliable.

With DLP technology, your imagination gets the resolution it deserves.

Technical Specifications of EKA XL

Model	EKAXLE
Technology	DLP Projector
Platform Size	202x113x200mm
XY Resolution	48 Micron
Z Resolution	20 to 70 Micron
UV Source Life	20,000+ Hours
Print Speed	upto 1500 Layer/hr*
Input Files	STL
Operating System	Windows
Weight	40 KG
Dimension	400x380x790 mm
Print Head	CNC Anodize Head
UV Curing Oven	Yes Free
Resin Tray	1 Tray
License Software	Yes Lifetime
Onsite Training	Yes Free
Shipping	Yes Free
Shipping Insurance	Yes Free

Materials for EKA XLE

TOUGH RESIN Create high strength parts which can be directly used in general applications as replacement of exhisting spares/components.

FLEXIBLE RESIN Create high strength flexible components for specific applicatons.

STANDARD RESIN Best suitable to make general prototypes with high quality surface finish.

Materials for EKA XLE

TRANSPARENT RESIN

High transparency resin is high clear like crystal, mechanical property is like acrylic. Clear 3D printing resin able to be used directly manufacturing for high-end 3d printed earplug, keyboard cap, glasses etc.

CERAMIC LIKE RESIN

Uses for ceramic-like resins include professional manufacturing, automotive, aerospace, engineering, architecture, design, and more.

No. 106, 1st Floor, Carmel Complex, 1/7, Geddalahalli,
Hennur Main Road, Bengaluru – 560077
